INDEX TO VOLUME 15

ARTICLES

Alford, Charles L. and Joseph Barry Mason. **Generating New Product Ideas.**
No. 6, pp. 27-32.
Scanning all combinations of relevant product dimensions underlies new idea generation.

Azhari, Abdul C. See Kamen, Azhari, and Kragh.

Banks, Seymour. **Public Policy on Ads to Children.**
No. 4, pp. 7-12.
The author reports relevant research increasingly guides public policy on children's ads.

Blankenship, A. B. **What Marketing Research Managers Want in Trainees.**
No. 1, pp. 7-14.
A mail survey of 578 employers gives evidence of desirable qualities.

Buell, Victor P. **Where Advertising Decisions Should Be Made.**
No. 3, pp. 7-12.
In-depth interviews with 63 managers in 20 divisionalized, consumer-goods companies suggest who has the final say-so.

Caron, Andre and Scott Ward. **Gift Decisions by Kids and Parents.**
No. 4, pp. 15-20.
About one-quarter of a group of Montreal children's requests to Santa were for things they'd seen on TV.

Cheles-Miller, Pamela. **Reactions to Marital Roles in Commercials.**
No. 4, pp. 45-49.
What children learn may not be the same as the advertiser's intention.

Cox, Keith K. See Enis and Cox.

Donohue, Thoms R. **Effect of Commercials on Black Children.**
No. 6, pp. 41-47.
About as many children bought cereal for the prize inside as for the cereal itself.

Dresden, Mark K., Jr. and Leonard Freifelder. **Medical Advertising Page Exposure.**
No. 1, pp. 43-46.
Relative to a conventional additive model, a multiplicative model explained twice as much variance for medical ads.

Enis, Ben M. and Keith K. Cox. **Ad Experiments for Management Decisions.**
No. 2, pp. 35-40.
From a review of several studies, the authors show the pros and cons of using research for making decisions.

Eskin, Gerald J. **A Case for Test Market Experiments.**
No. 2, pp. 27-33.
In test marketing a new food product, low price and high advertising led to greatest sales, but high price and low advertising gained as much immediate profit.

Fennell, Geraldine. **Motivation Research Revisited.**
No. 3, pp. 23-27.
The author identifies five kinds of motivating situations by which consumers may classify themselves.

Foley, William F. See San Augustine and Foley.

Freifelder, Leonard. See Dresden and Freifelder.

Friedman, Hershey H. See Goldstein and Friedman.

Glasser, Gerald J. and Gale D. Metzger.
No. 5, pp. 39-45.
Radio generally is used more by blacks, while FM radio is used more by whites.

Goldstein, Larry and Hershey H. Friedman. **A Case for Double Postcards in Surveys.**
No. 2, pp. 43-47.
Responses to one-page questionnaires and postcards were similar in their validity, content, length and depth.

Gronhaug, Kjell. **How New Car Buyers Use Advertising.**
No. 1, pp. 49-53.
Personality scores worked better than demographics in distinguishing ad readers from nonreaders.

Gutman, Jonathan. See Myers and Gutman.

Haskins, Jack B. **Pretesting Interest in Messages.**
No. 5, pp. 31-35.
Short descriptive verbal concepts can predict interest in whole messages such as films, books, or ads.

Horowitz, Irwin A. and Russell S. Kaye. **Perception and Advertising.**
No. 3, pp. 15-20.
How the consumer sees a product depends upon his state of mind.

Haskins, Jack B. **Pretesting Interest in Messages.**
No. 5, pp. 31-35.
Short descriptive verbal concepts can predict interest in whole messages such as films, books, or ads.

Horowitz, Irwin A. and Russell S. Kaye. **Perception and Advertising.**
No. 3, pp. 15-20.
How the consumer sees a product depends upon his state of mind.

Jain, Chaman L. **Broadcast Support to Newspaper Ads.**
No. 5, pp. 69-72.
Television support of preprint ads significantly increases responses and lowers costs of acquiring them.

Kamen, Joseph M., Abdul C. Azhari, and Judith R. Kragh. **What a Spokesman Does for a Sponsor.**
No. 2, pp. 17-24.
Johnny Cash increased motorists' awareness of Amoco advertising and changed their image of the company.

Kaye, Russell S. See Horowitz and Kaye.

Keiser, Stephen K. **Awareness of Brands and Slogans.**
No. 4, pp. 37-43.
Age, social class and print media readership among adolescents were related to brand and slogan awareness.

Kragh, Judith R. See Kamen, Azhari, and Kragh.

Laurie, Liz. **Measuring Commercial Impact.**
No. 4, pp. 23-25.
"They should talk better and not say the same things," says one expert who's seen thousands of TV spots. He's nine years old.

Lipstein, Benjamin. **In Defense of Small Samples.**
No. 1, pp. 33-40.
Along with nine rules for reducing nonsampling errors in surveys, Dr. Lipstein suggests why small samples may be better than larger ones.

Losco, Jean. See Venkatesan and Losco.

Mason, Joseph Barry. See Alford and Mason.

Metzger, Gale D. See Glasser and Metzger.

Miller, Peter B. See Rao and Miller.

Moore, Rolf L. See Stephens and Moore.

Myers, James H. and Jonathan Gutman. **How to Analyze Consumer Behavior.**
No. 6, pp. 19-24.
The authors present seven parts of a general plan showing analysis of consumer behavior.

Orpen, Christopher. **Reactions to Black and White Models.**
No. 5, pp. 75-79.
The social class of South African "coloureds" did not have an effect on their reaction to black and white models.

Rao, Ambar G. and Peter B. Miller. **Advertising/Sales Response Functions.**
No. 2, pp. 7-15.
Bi-monthly sales of five Lever brands in 15 districts were related to dollars spent on TV, print, price-off and trade promotions.

Roshwalb, Irving. **How Much Is an Ad Test Worth?**
No. 1, pp. 17-23.
Including managers' judgments in statistical tests helps to determine the value of an ad test.

Rust, Langbourne and Thomas A. Watkins. **Children's Commercials: Creative Development.**
No. 5, pp. 21-26.
Action and story line are found to be the most important aspects in TV commercials that hold children's attention.

San Augustine, Andre J. and William F. Foley. **How Large Advertisers Set Budgets.**
No. 5, pp. 11-16.
"Budgeting by ear" seems to be the rule, rather than the exception, for setting the size of large advertisers' budgets.

Schwartz, David A. **T-Scope Package Test Sample Size.**
No. 3, pp. 35-37.
At least 50 respondents are required to reliably measure the speed of brand identification.

Shosteck, Herschel. **Shopping, Voting, and Media Preference.**
No. 6, pp. 35-38.
Preferred stores and candidates were related to preferred radio stations and TV viewing times.

Stephens, Lowndes F. and Roy L. Moore. **Price Accuracy as a Consumer Skill.**
No. 4, pp. 27-34.
High-schoolers know better than grammar-schoolers the prices of six out of nine products.

Tauber, Edward M. **Predictive Validity in Consumer Research.**
No. 5, pp. 59-64.
The author illustrates six insights that can be gained from predictive validation studies.

Urban, Glen L. **Allocating Ad Budgets Geographically.**
No. 6, pp. 7-16.
Professor Urban reports results of two years' use of an on-line model for budgeting.

Venkatesan, M. and Jean Losco. **Women in Magazine Ads: 1959–71.**
No. 5, pp. 49-54.
Women portrayed as sex objects have decreased since 1959, but other stereotypes have not.

Waddle, Gerald L. See Woodside and Waddle.

Ward, Scott. See Caron and Ward.

Watkins, Thomas A. See Rust and Watkins.

(Index – Continued on page 33.)

(Index continued from page 49.)

Woodside, Arch G. and Gerald L. Waddle. **Sales Effects of In-Store Advertising.**
No. 3, pp. 29-33.
Point-of-sale promotion more than doubled the effect of price-reduction on unit sales of instant coffee.

Joseph Kamen — No. 5, pp. 83-84

Are you a discriminating researcher?

MEASUREMENT IS OUR BUSINESS.

We have expertise in measuring consumer behavior to solve marketing and communications problems.

We have pioneered unique approaches which work for the difficult areas of concept testing, new product development, and market segmentation.

Our methods move into high gear at the point where traditional procedures falter.

OUR SPECIALIZED SERVICES —

CEPTRE: A powerful flexible method for evaluating product concepts which is more effective and less costly than other methods.

DISCRIMINATOR: Segmentation procedure which identifies discriminators whose response determines the success of marketing innovations.
